## BALL MACHINES

Ball machines have been designed to help

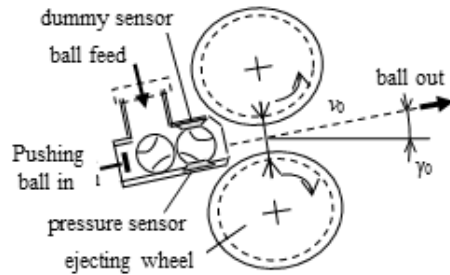

Ball machines launch a ball with perfect accuracy at up to speeds of 100 mph to assist you in returning the ball working on footwork and swing.

A ball machine propels the ball using rotating wheels. The wheels draw the ball in and launch

By rotating the wheels at different speeds the machine can apply spin to the ball too.

How a ball moves through the machine.

A ball ready to be shot out of the machine.

Design your own piece of technology to help you practice tennis.
